GET DATATABLES

[Download](#)[Purchase](#)

The best method for getting a hold of DataTables for use in your project depends upon your programming environment. The download builder below provides a simple method that you can use to build your own custom DataTables package - including only the software that you need, and providing options to have it hosted on the [DataTables CDN](#), download the package locally or install through a package manager such as *npm*, *yarn* or *NuGET*.

If you are upgrading an old version of a DataTables CDN or downloaded file created by this download builder and want to use the same build options with the latest versions, look in the JS file header and you'll find a URL that will automatically select the options needed.

Compatibility

#

A detailed [compatibility table](#) shows the browser's that DataTables supports and also which features of the extensions can be used with the other extensions. A few features may not always be fully compatible with every other aspect of the software (due to overlapping functionality), so please take the time to review this table.

Step 1. Choose styling

☐	DataTables	DataTables' default styling.	v2.3.5
☐	Bootstrap 3	Legacy version of Bootstrap - useful if you need to support old browsers.	v3.3.7
☐	Bootstrap 4	v4 of possibly the world's most widely used styling library.	v4.6.0
☒	Bootstrap 5	The latest iteration of the ever popular Bootstrap framework.	v5.3.0
☐	Bulma	Modern CSS framework based on Flexbox	v1.0.1
☐	Foundation	A modern responsive styling framework.	v6.4.3
☐	jQuery UI	A collection of Javascript widgets as well as a styling framework.	v1.13.2
☐	Fomantic UI	Treats words and classes as exchangeable concepts. Formally Semantic UI.	v2.8.8

Step 2. Select packages

Libraries

☐	jQuery	DOM and event utility library. Don't select if you already have it.	v3.7.0
☐	Moment	Date and time library for ordering and formatting dates.	v2.29.4
☐	React component	React component for DataTables	v1.0.0
☐	Vue component	A Vue component for DataTables	v3.0.4
☐	Bootstrap 5	Don't select if you already have Bootstrap 5 on your page.	

DataTables core

☒	DataTables	Enhance HTML tables with advanced interaction controls.	v2.3.5
☐	Editor	Add full editing controls to your DataTables. Editor is a commercial extension for DataTables, it requires a license to use it for longer than the free trial period. Please create an account or login to be able to include Editor in the package.	v2.5.1

Extensions

☐	AutoFill	Excel-like click and drag copying and filling of data.	v2.7.1
☒	Buttons	A common framework for user interaction buttons.	v3.2.5
☒	Column visibility	End user buttons to control column visibility.	v3.2.5
☒	HTML5 export	Copy to clipboard and create Excel, PDF and CSV files from the table's data.	v3.2.5
☒	JSZip	Required for the Excel HTML5 export button.	v3.10.1
☒	pdfmake	Required for the PDF HTML5 export button.	v0.2.7
☒	Print view	Button that will display a printable view of the table.	v3.2.5
☐	ColReorder	Click-and-drag column reordering.	v2.1.2
☐	ColumnControl	Column specific buttons and search controls.	v1.1.1
☐	DateTime	Date picker used in Editor, SearchBuilder and other components for DataTables.	v1.6.1
☐	FixedColumns	Fix one or more columns to the left or right of a scrolling table.	v5.0.5
☐	FixedHeader	Sticky header and / or footer for the table.	v4.0.5
☐	KeyTable	Keyboard navigation of cells in a table, just like a spreadsheet.	v2.12.2
☒	Responsive	Dynamically show and hide columns based on the browser size.	v3.0.7
☒	RowGroup	Show similar data grouped together by a custom data point.	v1.6.0
☒	RowReorder	Click and drag reordering of rows.	v1.2.6

 RowReorder	Click-and-drag reordering of rows.	v1.5.0
 Scroller	Virtual rendering of a scrolling table for large data sets.	v2.4.3
 SearchBuilder	User defined complex search builder.	v1.8.4
 SearchPanes	Search panels for DataTables allowing rapid and customisable filtering.	v2.3.5
 Select	Adds row, column and cell selection abilities to a table.	v3.1.3
 StateRestore	Save and restore DataTables states.	v1.4.3

Step 3. Pick an installation method

#

[CDN](#)
[Download](#)
[NPM](#)
[NuGet](#)
[Composer](#)

The files required for the [link Tag](#) and [script Tag](#) tags shown above can be downloaded using the button below. The package is downloaded as a zip file which should be unzipped and uploaded to your web-server.

```

1 <link href="DataTables/datatables.min.css" rel="stylesheet">
2
3 <script src="DataTables/datatables.min.js"></script>
```
